SKILL  EXPLORER

The new Wisconsin job search.

SKILL  EXPLORER

The new Wisconsin job search.

JOB TITLES SHOW WHERE YOU'VE BEEN. SKILLS SHOW HOW FAR YOU CAN GO.

Introducing Skill Explorer, a new job search tool that goes beyond job titles to find opportunities that match the skills and training you have – but in career fields you may not have considered. Skill Explorer shows you more options, and more options mean a better chance to find a job.

Using Skill Explorer

Skill Explorer makes it easy to look for new career opportunities. You only need a working knowledge of your employment history. To get started, go to skillexplorer.wisconsin.gov and type in your current or past job.

Skill Explorer will match the title with other jobs that share common abilities and characteristics.

Explore Matches & Compare Skills

Skill Explorer doesn't just show you a list of current openings. It also helps you succeed by giving you all the information you need to make smart career choices. You can see new opportunities that relate to your work experience and learn about any special skills or training you might need before you apply for a job. The higher the percentage of shared skills, the closer the match.

Occupation overviews give you an insider's look at the career path you select. Find out what a worker usually does, how much they make, and what kind of training or educational background they have.

Skill Explorer - STATE OF WISCONSIN DWD

Search for jobs by the Department of Workforce Development

Selected Occupation: Welders, Cutters, Solderers, and Brazers

Overview | Skills & Education | Current Jobs

Overview for: Metal Workers and Plastic Workers, All Other

Occupation description: All metal workers and plastic workers not listed separately, SOC Code is 81-9000.

Typical Tasks: Fit and align fabricated parts to be welded or assembled. Determine sizes and compositions of objects to be plated, and amounts of electrical current and time required. Operate safety equipment and use safe work habits. Suspend sticks or pieces of plating metal from anodes (positive terminals) and remove metal in plating solutions. Inspect coated or plated areas for defects such as air bubbles or uneven coverage. Read production schedules and work orders to determine processing sequences, furnace temperatures, and heat cycle requirements for objects to be heat treated. Monitor and measure thicknesses of electroplating on component parts in order to verify conformance to specifications, using micrometers. Weld components in flat, vertical, or overhead positions. Dress grinding wheels, according to specifications. Inspect, measure, or test completed metal workplaces to ensure conformance to specifications, using measuring and testing devices.
