

Wisconsin's WIA WP AO State Plan Clarification/Additions
Posted November 2, 2012

Quarterly Wage Record Data
 State Plan Page 55

Wisconsin uses quarterly wage information from state Unemployment Insurance (UI) and Wage Record Interchange System (WRIS) records. Automated processes add this information to the WIASRD and the information is included in performance measures. The performance measures are generated by the Data Reporting and Validation System (DRVS). The state IT staff create reports and files measuring the progress on state and local performance measures and distribute this information to local WDB staff. Central Office program staff have access to these data. Currently, the data for the local staff does not include individual wage information but it does include the aggregated wage amounts for the local area. Recently, state UI security has allowed the release of UI wages to all WDBs. The WDBs have access to UI wage data through UI's IT system online. DET staff is scheduled to work with the WDBs on creating reports with these UI data.
