

System Time Out

After 45 minutes of no activity (retrieving a screen, a click on the Save Complete or other buttons, etc.) JobNet Business will time out. The following message box will appear when a user selects a system function:

Please note: Save your work frequently. Any work not saved will be lost when the system times out.

To restart JobNet Business, position the mouse pointer over the **OK** button and click once. The response will be the Welcome screen as shown previously. To exit, position the mouse pointer over the **Exit** button and click once. The following message box will appear:

System sign off has now taken place. The above message box contains a hyperlink to the Department of Workforce Development (DWD) home page.
