

ASSET Changes Implemented

The following changes to ASSET were implemented on November 11, 2019:

Social Security Number (SSN) Masking

For security purposes, for those staff whose access role allows view of SSNs, the SSN field now only initially displays the last 4 digits:

The screenshot shows the 'ASSET - Customer Details for Bianca George (12437)' interface. At the top, there are 'Save' and 'Event History' buttons. Below these are tabs for 'Contact Details', 'Demographics', 'Military Service', 'Case Management Info', and 'Job Center of Wisconsin'. The 'Contact Information' section includes fields for PIN (12437), Intake Date (12/16/2015), Social Security Number (***-**-2324), Title (dropdown), and First Name (Bianca). A 'Create Pseudo SSN' button is next to the SSN field.

On click in the Social Security Number field, all 9 digits are displayed:

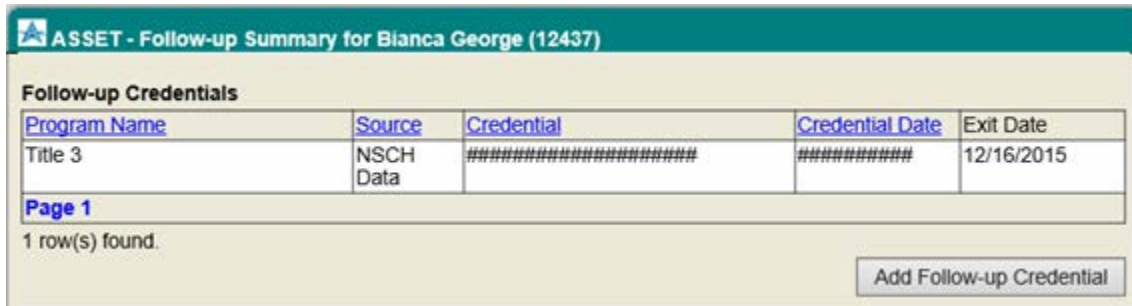

This screenshot is identical to the previous one, but the Social Security Number field now displays the full number '423-24-2324' instead of the masked version. A mouse cursor is visible over the field.

There is no change for those with ASSET roles that do not allow view of SSN.

Credentials from National School Clearing House (NSCH)

ASSET now receives a file of credentials from the National School Clearinghouse. Follow-up Credentials will automatically populate (Manage Follow-ups - Follow-up Credentials section) for customers known to ASSET. Due to our contract, we are limited in how we can display this data in ASSET.

- Source will = "NSCH Data"
- Credential and Credential Date will be masked
- No link to details is available

ASSET - Follow-up Summary for Bianca George (12437)

Follow-up Credentials

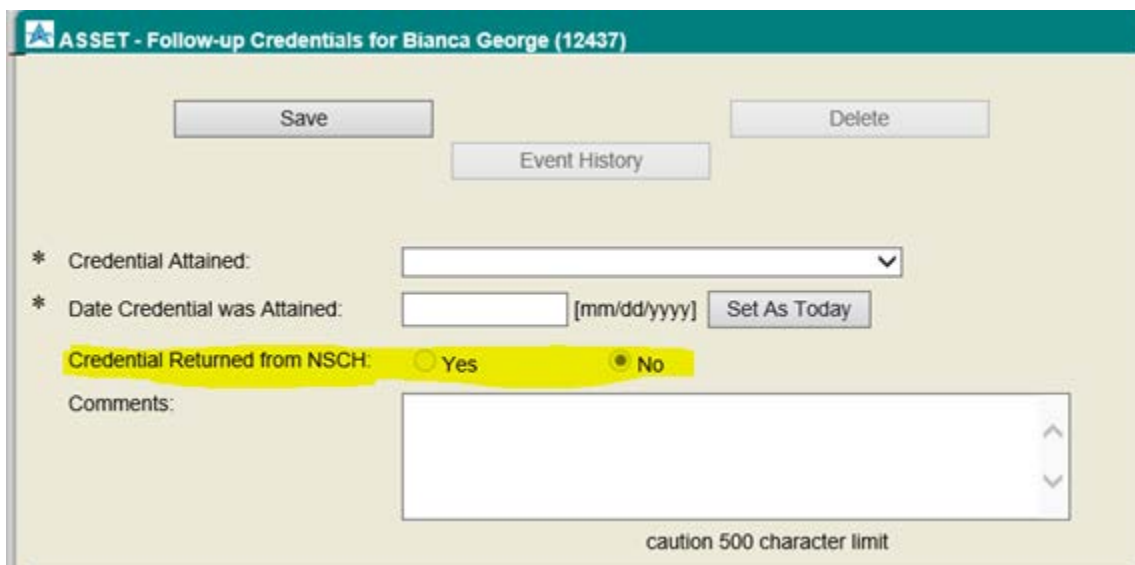

Program Name	Source	Credential	Credential Date	Exit Date
Title 3	NSCH Data	#####	#####	12/16/2015
