ASSET Small Improvements and Enhancement Changes.....2

General Updates.....2

Individual Employment Plan (IEP) .....2

Referrals .....2

OVES / JVSG .....2

## ASSET Small Improvements and Enhancement Changes – Will be deployed on December 11, 2024

### General Updates

- Fixed an issue where a user was not able to upload a document to ASSET
- Fixed an issue where a user reported a system error message when accessing a specific PIN

### Individual Employment Plan (IEP)

- Added a new option to identify the number of "Review Days" as Not Applicable for a situation for easier and more accurate reporting on the IEP

### Referrals

- Provided a fix to prevent staff from creating duplicate referrals, Customer Notes, and Service records if they clicked on the Submit button multiple times while the system was in the middle of processing a submitted Referral.
- Removed the ability for ASSET users to edit the Status on a referral that is submitted to DVR. The Status field on referrals sent to DVR will be read-only.

### OVES / JVSG

- Refinement of logic around alerting OVES Staff about potential DVOP-eligible JCW Job Seekers to account for more scenarios such as having previously declined services or having received services within the past 6 months

### Staff Requests

- Fixed an issue where the wrong Customer Name was being displayed on the Staff request

### Re-employment Services (RESEA)

- Updated the RESEA session holiday calendar for 2025 to prevent RESEA sessions from being created on a state holiday when staff are not working (like Christmas Day or Thanksgiving)
