To Whom It May Concern,

I am writing as the owner of a video production company in Milwaukee called, Circle Pictures, dba. I have owned my company for over 10 years and have worked in the video production community in Milwaukee for over 30. When I started my career, everything was shot on either 16 or 35mm film.

I have worked with Jordan McCormick as a freelancer in production and truly respect her passion for the industry and her dedication to hard work and her open mind to learning. When I heard that she was a partner in developing the MTC training program for video and media productions I was excited to hear more.

I think MTC will add value to our industry and Full Circle would welcome interns, and freelancers that come out of their training program. Our industry needs well trained ambitious workers and I think MTC has the knowledge and experience to make that happen. More well-trained people in our industry will help grow the production community and therefore the production business throughout our state. There is a shortage of video crew in Wisconsin. Having a place like MTC for people that are interested in our industry to go to, for training in our field will be a welcomed addition to our industry.

I would be happy to work with interns and freelancers that successfully complete the training and are interested in going further in the direction of video production.

Sincerely,

Sue Karpfinger  
Founder/Producer
