

# CBRF TRAINING & CONSULTING, LLC

## CBRF Employee Course

Since 2010-

CBRF Training & Consulting has served CBRFs, AFHs, and RCACs throughout the State of Wisconsin providing DHS 83.20 employee training and all four Train the Trainer courses, continuing education for Train the Trainer as well as employee DHS 83.25 continuing education, mock surveys, plans of correction, and RN oversight for regulatory requirements.

# First Aid & Choking Employee Course

\$120.00

This is a 4 hour course, plus testing time per UW Green Bay's Care and Treatment Training Registry requirements.

The only form of verification to State Survey staff that an employee has taken this course is verification through the UWGB Registry; therefore, no certificates are provided- and students that successfully complete this course will be added to the UWGB Registry within 24 hours. This registry is the sole verification to Wisconsin State Surveyor staff that the course has been completed on or after April 1 of 2010 with the DHS 83 re-write.

This class has been approved through the DHS and UWGB to be conducted via distance learning using an approved distance learning format. Employers can request if they would prefer on site training.

Employers are encouraged to send their current infection control plan, incident report forms, and current policy and procedures related to first aid and choking as well clarification as to if facility provides CPR and if there is any RN oversight to the instructor prior to class to promote facility-specific training to set their employees up for success when they return to their job site.

Training materials will be sent to the participants prior to class to ensure adequate curriculum delivery.

Within 90 days after starting employment, all employees shall successfully complete training in first aid and procedures to alleviate choking.

Please note, if an employee is left alone on the floor prior to 90 days after starting employment review DHS 83.23 Employee Supervision.

DHS 83.20(2)(a)

# Fire Safety Employee Course

\$90.00

This is a 3 hour course, plus testing time per UW Green Bay's Care and Treatment Training Registry requirements.

The only form of verification to State Survey staff that an employee has taken this course is verification through the UWGB Registry; therefore, no certificates are provided- and students that successfully complete this course will be added to the UWGB Registry within 24 hours. This registry is the sole verification to Wisconsin State Surveyor staff that the course has been completed on or after April 1 of 2010 with the DHS 83 re-write.

This class has been approved through the DHS and UWGB to be conducted via distance learning using an approved distance learning format. Employers can request if they would prefer on site training.

Employers are encouraged to send their current fire safety emergency and disaster plan to the instructor prior to class to promote facility-specific training to set their employees up for success when they return to their job site.

Training materials will be sent to the participants prior to class to ensure adequate curriculum delivery.

Within 90 days after starting employment, all employees shall successfully complete training in fire safety.

Please note, if an employee is left alone on the floor prior to 90 days after starting employment review DHS 83.23 Employee Supervision.

DHS 83.20(2)(a)

# Medication Administration Employee Course

\$210.00

This is a 14 hour course per UW Green Bay's Care and Treatment Training Registry requirements. Due to the nature of this class, coursework may be longer than the 14 hour minimum length requirements.

The only form of verification to State Survey staff that an employee has taken this course is verification through the UWGB Registry; therefore, no certificates are provided- and students that successfully complete this course will be added to the UWGB Registry within 24 hours. This registry is the sole verification to Wisconsin State Surveyor staff that the course has been completed on or after April 1 of 2010 with the DHS 83 re-write.

This class has been approved through the DHS and UWGB to be conducted via distance learning using an approved distance learning format. Employers can request if they would prefer on site training.

Employers are requested to send clarification on their unit dose packaging system (bubble cards, strip packaging, OPUS cassette ect) as well if there is any RN oversight to the instructor prior to class. This ensures that the instructor can not only send the correct packaging materials to the students prior to class (if conducted distance learning) but also ensures that the instructor can promote facility-specific training to set their employees up for success when they return to their job site.

Training materials will be sent to the participants prior to class to ensure adequate curriculum delivery. The materials for this course also include curriculum-specific unit dose packaging with eight possible oral medications, transdermal patches, topical creams, handheld inhalers, and ophthalmic eye drops.

Any employee who manages, administers or assists residents with prescribed or over-the-counter medications shall complete training in medication administration and management prior to assuming these job duties.

DHS 83.20(2)(a)

# Standard Precautions Employee Course

\$90.00

This is a 2 hour course, plus testing time per UW Green Bay's Care and Treatment Training Registry requirements.

The only form of verification to State Survey staff that an employee has taken this course is verification through the UWGB Registry; therefore, no certificates are provided- and students that successfully complete this course will be added to the UWGB Registry within 24 hours. This registry is the sole verification to Wisconsin State Surveyor staff that the course has been completed on or after April 1 of 2010 with the DHS 83 re-write.

This class has been approved through the DHS and UWGB to be conducted via distance learning using an approved distance learning format. Employers can request if they would prefer on site training.

Employers are encouraged to send their current infection control plan to the instructor prior to class to promote facility-specific training to set their employees up for success when they return to their job site.

Training materials will be sent to the participants prior to class to ensure adequate curriculum delivery.

All employees who may be occupationally exposed to blood, body fluids or other moist body substances, including mucous membranes, non-intact skin, secretions, and excretions except sweat, whether or not they contain visible blood shall successfully complete training in standard precautions before the employee assumes any responsibilities that may expose the employee to such material.
